

Connor Bray

(207) 272-6463 | connor@connorbray.net | Portland, ME

Experience

Tyler Technologies

Software Engineer

Yarmouth, ME

May 2021 – Present

- Translated legacy codebase to C# .NET, improving code maintainability and scalability
- Designed and implemented end-to-end, unit, and regression tests to ensure functional parity with the original system
- Streamlined deployment infrastructure by automating key components of the CI/CD pipeline
- Collaborated with cross-functional teams to gather requirements and deliver high-quality software solutions
- Oversaw a team of 3 engineers and an intern, providing mentorship and guidance on best practices

UMaine Student Government

President

Orono, ME

May 2022 – May 2023

- Served as the chief executive of a 501(c)(3) non-profit managing an annual budget exceeding \$1,000,000
- Collaborated with President, Chancellor, Dean of Students, and Provost to develop campus goals
- Supervised 20+ employees, including 10+ direct reports, and led a governance board of 40+ total members

Education

University of Maine

B.S. Computer Science

Orono, ME

- Student Body President

Projects

connorbray.net

Personal website showcasing resume, portfolio, and photography, built for performance and scalability.

- Front-end built using React, TypeScript, Remix/React Router 7
- Back-end built using Cloudflare Workers, AWS S3, and Terraform
- TypeScript, Remix/RR7, Cloudflare Workers, AWS S3, Terraform, GitHub Actions
- Developed a serverless API with Cloudflare Workers and a CMS powered by AWS S3 and Cloudflare
- Generated resume using JSON schema validation with custom HTML/CSS rendering
- Automated infrastructure using Terraform and deployed via GitHub Actions CI/CD pipeline
- Emphasized accessibility and speed with fully tested (unit, integration, e2e) architecture

Skills/Interests

Languages: C#, JavaScript/TypeScript, Python, SQL, C

Technologies: Git, React, Terraform, AWS, Containerization

Interests: Distributed Computing, Containerization, Software Infrastructure
